FABRIC INFORMATION

BREATHABILITY

CREASE
RESISTANT

DURABILITY
AND STABILITY

EASY CARE

INDUSTRIALLY
LAUNDERABLE

Performance

The majority of fabrics that we use contain polyester with cotton.

This ensures the durability of this fabric as the portion of polyester fibre is prominent and significant and offers other advantages over 100% cotton fabrics in terms of lower shrinkage, superior crease recovery and enhanced colour retention after washing.

Accordingly, fabrics we use remain very smart, wash after wash, over a long period of time.

Comfort

In addition to physical characteristics, fabrics we use are also very comfortable to wear. In addition to the significant level of cotton which absorbs perspiration, they allow high levels of air flow, facilitating evaporation and improving the comfort accordingly.

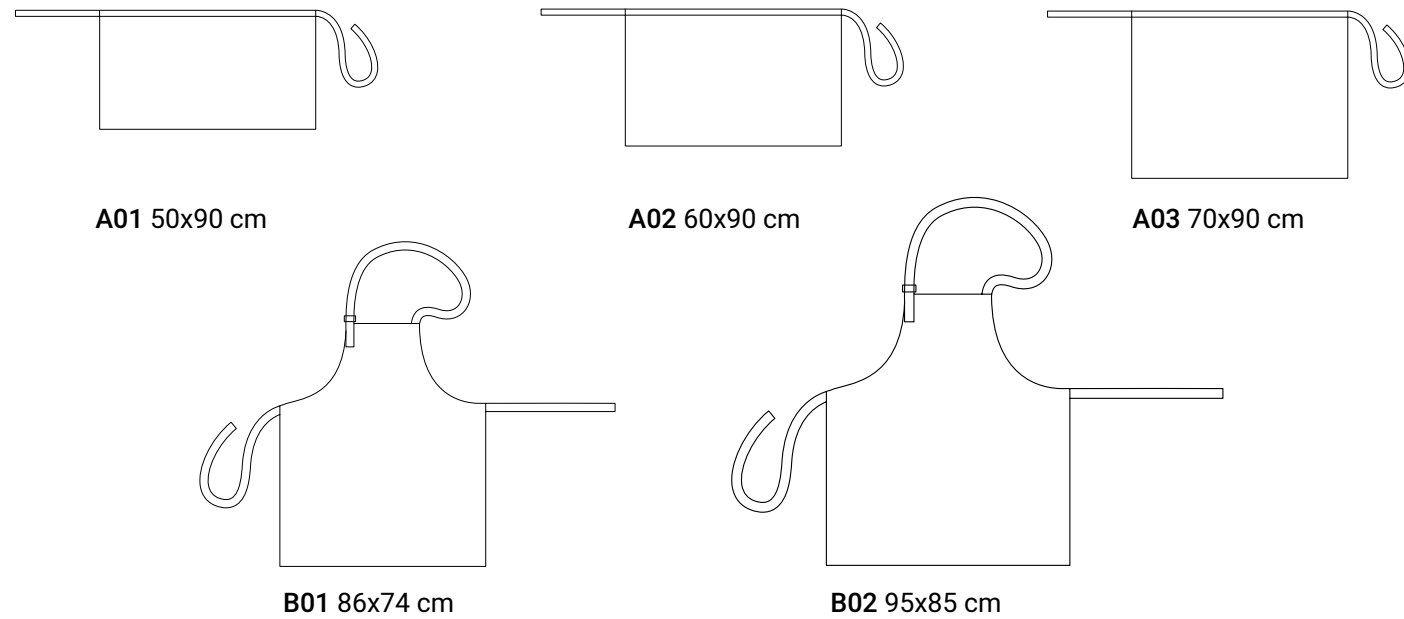

Industrial laundering

Fabrics we use meet the highest possible standards for fabric performance in industrial laundering, covering such areas as shrinkage, pilling, strength and crease recovery.
